OIL SEALS TYPE WATER SEAL

- Secondary seal for oil film bearings installed as a protection from the cooling media. Available also with a finger spring vulcanized in the sealing lip.

- The finger spring has the function to constantly maintain the lip preloaded, even after the rubber loses its flexibility with time. The finger spring also enables the sealing lip to better copy the axial movement of the shaft.

- The Water Seal is available also without finger spring.

- Also available with its corresponding BBS® seal type (primary seal).

Applications
Primary metals industry

Dimensions: Minimum I.D. 200mm; Maximum O.D. 1.800 mm
Operating temperature range: -40°C / +160°C
