

F.LLI PARIS S.R.L. A SOCIO UNICO

[www.fpparis.com](http://www.fpparis.com)

Dear customer,

did you know that F.Ili Paris. Srl a socio unico does not only mean production of high-quality rotating shaft oil seals?

We are famous for this activity thanks to our presence on the market for over 40 years, though our group is made up of 4 production divisions with the addition of 2 local warehouses located in Italy and a worldwide distribution supported by SEALCORE Network ([www.sealcore.net](http://www.sealcore.net)), of which F.Ili Paris is one of the founding members. We are proud to produce everything in house and certify our quality as “Made in Italy”.

•FP• – F.Lli Paris. Srl a socio unico is specialized for more than 40 years in the production of rotary shaft oil seals, but also rubber-to-metal and textile-rubber seals or even 100% elastomer-made items molded with a compression process . We are able to manage both large and small batches and specialized in customizing the job starting from scratch and controlling the entire production chain: from the design of the technical drawing to the realization of the mold, up to the finished article. Everything totally controlled in house.

ATS Special Oil Seals S.r.l. has been studying and manufacturing for more than three decades special oil seals, mainly with large diameter and for Heavy-Duty applications, starting from the study and construction of the mold up to the realization of the finished products. We guarantee endless rings up to a diameter of 2.2 meters and can produce even larger diameters with our innovative vulcanized-jointing technique, in response to specific requests. The range of items we offer is wide: all types of V-Rings and rubber-to-metal seals, but also textile-rubber rings in various models and metal reinforced oil seals.

SLIB ITALY is a production division of •FP• dedicated to the production of self-lubricating metal bushings and washers for use in the energy, valve and engine industry, with a wide range of sizes and a portfolio of various metals very nourished and constantly in stock, which allow us extremely rapid production and quick delivery thanks to the FasTrack service. We are also the only company in Europe that can simulate the use of bushings for the valve sector, thanks to a test bench engineered and built specifically to provide additional quality assurance to our products.

FP MILANO and FP MODENA are an integral part of the •FP• group and distribute the range of items produced by all the Sealcore Network companies, dealing as retail distribution for stock products. These two realities are well structured with commercial and technical figures able to give a lot of added value to the customer's requests thanks to professional service, consultancy and co-design for customized solutions. The flexibility and reliability of our distribution system, added to the large stock availability, allow us to comfortably manage the supply of both the single piece as much as large quantities, with ISO 9001: 2015 certified quality guarantee.

The •FP• group is much more than just a company. We can be your sole or primary contact for the study and supply of multiple seals and articles to drawing. Thanks to the interaction with the other companies in the Sealcore Network we can also provide you with a complete range of products that may serve your business. Contact us for further information. We will be happy to serve you at our best.
