

CERTIFICATE

This is to certify that:

Istvan Robert Hajzer

**has successfully completed the
APQP4Wind Specialist Training,
including a written examination**

The course consists of 4 days and includes the following topics:

- **Advanced Product Quality Planning (APQP)** for the wind industry specialist
- **Production Part Approval Process (PPAP)** for the wind industry specialist
- Risk Management along the product value chain including tools and methods to monitor and control
- **Core tools** training in FMEA, Special Characteristics identification, Control Plan, SPC / Process Capability and MSA

A certified specialist can lead APQP4Wind project successfully by bringing together cross functional expertise, monitoring project milestones and early risk avoidance.
